

Vessel Safety Check

Saturday, March 13, 2010

Once again the Gulf Harbour Yacht Club is offering vessel safety checks performed by the Sanibel Power Squadron. This will be offered to those pre-registered on Saturday morning, March 13th as part of our Fleet-In activities.

To preview the checklist that will be used to inspect your vessel, go to <http://forms.cgaux.org/archive/a7012.pdf>. Please make

sure that your safety equipment, including fire extinguishers and flares are functional and up to date. Upon successful inspection of your vessel, you will receive the 2010 Vessel Safety Check decal to be prominently displayed on your vessel. This may prevent a random on the water check by marine officers when they see that your vessel has already passed inspection for the year. If you are interested in having your vessel inspected on March 13th, contact [Rear Commodore John Hess](#) (239-243-8390) to be included in this worthwhile event.

Safe, Responsible & Fun Boating!
